

Forklift Safety Cage (Rail Sides)

Product Code: BMP001-R / RG

Use your forklift to reach new heights.

Fully welded in accordance with Australian Standard for Forklifts AS2359.1, this forklift cage has a fully pressed checker plate tub section, supported with a welded base structure to offer a robust design that will handle any task required for height safety. There is also a standard self-closing gate and removable head board section with mesh infill panels on the rear of the cage.

Choose from:

- Fully Powder Coated unit (BMP001-R) or
- DuraGal finish (BMP001-RG)

Both these units are supplied with a safety harness attachment point that meets Australian Standard AS1891.4. Bremco also sells forklift safety harness complete with lanyard. Manufactured in our Australian factory, we offer a money back guarantee on our work and offer fast, Australia-wide delivery.
