

Forklift Extension Slippers

Product Code: BMP003

Reach further with your forklift tyres.

Bremco's Forklift Extension Slippers allow you to temporarily lengthen the tynes of your Fork Truck for load stability and are ideal for large crates or machinery items.

The slim profile of our Forklift Extension Slippers are made from fully fabricated plate sections.

With safety pins to hold the tynes in, these extension slippers allow you to work safely on your forklift. To find the right size for your forklift, read the specifications below, or, feel free to contact the Bremco team.

Keep your workplace safe and operating effectively with Bremco forklift attachments.

Specifications

- In accordance with AS2359.15 Forklift Slippers for general use should be no longer than 167% of the supporting forklift tyre length. If the slippers are longer than this, then their use shall be restricted to their specified application.
- Finish: hot dip galvanised

NB: Complies with AS2359.1 section 15. Compliance plate and serial number attached.

For complete engineering specifications please refer to specifications sheet on our website.
