

## Goods Cage Mesh Panel (Crane Lift)

Product Code: BMP018-M-DG

### Use your crane to reach new heights.

Bremco's Crane Cage (formerly Goods Cage with Mesh Panels) has been designed and engineered for use with most overhead crane systems, and can be transported using forklifts.

Our cage has a full swing gate that allows you to place a standard timber pallet inside the cage. The gate has secure two point locking system that prevents goods from coming loose when lifted.

Bremco produces these cages with mesh panels on all side faces, a sheet metal floor panel, and has four lifting points fully welded into the frame that are designed in accordance with AS4991.

4-leg chains are an optional extra.
