

Bremco's BMP029-T Oxy Acetylene Trolley is designed to be pushed, crane-lifted or fork-lifted around the work site. Ideal for use on construction sites where traditional trolleys may be difficult to manoeuvre around the site.

The Gas Cylinder Trolley has forklift channel guides under the base to offer a positive and safe way to lift product.

The overhead lifting frame is tested and certified to AS4991 and each trolley is tagged and tested, then supplied with a rating plate to meet the standard.

### SPECIFICATIONS
