Item # Ergomatic 1000-BC, Ergomatic Standard

Introduced by Liftomatic in 1994, This safe and effective portable drum handler is ideal for moving drums to and from pallets, skids, scales and spill or containment pallets. Parrot-Beak® Clamping mechanism grabs any steel, fiber or plastic drum automatically in lift operation. Its unique V shaped straddle leg configuration with telescopic adjustment settings for 600, 800 and 1000# capacity. Cushioned belt-cradle protects drum sidewall during lift, lower and transport
